Russia

Dear Stanislav,

Sorry for waiting! It was great to receive your letter. You asked: "What areas are developing the most now?" I thought a lot and finally realized that the IT sphere is really good now. Nowadays, the world is growing so fast that we always get new knowledge so late. This is your opportunity to stay ahead of the world. This is my opinion, but it doesn't mean anything, do what you want. Try you.

As you know, I study at ITMO University. A good institute is a big step in your future: new friends, connections and the latest information. But it's a waste of time if you don't learn on your own. When I start learning something interesting, I go deeper and deeper, and that's great.

What does it mean? I advise you to manage your time, don't waste it. Never forget - don't be a fool, relax if you're tired, help your mother and relatives if they ask. If something goes wrong, be brave and solve all your problems.

All the best,
Artyom
