Watching movies at home / in the cinema.

The last time I went to the movies was a long time ago. Now I watch almost all movies at home in front of my favorite screen.

Watching movies at home opens up a lot of new opportunities for you. You can eat all the food you want and talk about what's going on in the movie without thinking you're disturbing anyone. If you need to go somewhere, you can pause and not miss anything. And most importantly, you choose when to watch the movie, whether it's early in the morning or late in the evening.

For all these reasons, people now go to cinemas less.But this does not mean that when you come to the theater to find an empty room, that will never happen.But this does not mean that when you come to the theater to find an empty room, that will never happen. When we go to the cinema, we first of all get into another world with its own atmosphere, which immerses us in the world of cinema, makes us feel inside the film, makes us think about what's happening on the other side.

We all want to choose what is closer to us in terms of beliefs, tastes, character.One thing is certain - no matter how technology develops, even if it becomes possible to watch any movie from home, cinemas will always be in demand.
